

Music & Art Home Learning

Summer 2 – Week 8 (wb 20th July 2020)

Throughout this term, our topic has been '**Water**'. For our final (3-day) week, we are going to look at **Desert Islands**. An island is a piece of land that is surrounded by water.

This week, we would like you to let your imaginations run wild! We would like you to imagine what it would be like to be stranded on a desert island all alone.

We want you to think about:

- what music you would like to have on your desert island (up to 3 songs!)
- what your island looks like – produce a model, painting or picture of your desert island.

We would love to see your finished pieces of work - if you are able to take a photo or upload your work to Google Classrooms, that would be great!

SESSION 1

Desert Island Discs

There is a very popular radio programme called 'Desert Island Discs'. Famous or important people go on this programme and choose their favourite songs that they would like to have with them on their desert island.

All sorts of different people have appeared on the programme. They talk about why the piece of music, or song, is important to them. It may be because it reminds them of a special occasion – like when they were married or had a baby – or it could be an inspiring song, with inspiring lyrics (words) that helped them through a difficult time or gave them hope.

Recently, Joe Wicks (the 'virtual PE' chap) appeared on the show. One of his songs was chosen from the Disney film 'Moana'. He chose 'You're Welcome' because it made him happy and was a very cheery song.

[You can listen to it here: <https://www.youtube.com/watch?v=79DijltQXMM>]

What songs mean something to you?

Why are they so special?

We would like you to choose up to 3 songs to take on your desert island with you. We would love to know what you have chosen and why – please do share this with us on the Google Classroom! 😊

SESSION 2 & 3

What does your island look like?

In our English sessions this week, you have painted a picture in our minds with your beautiful **words**. We would now like you to show us with a **picture** of your desert island.

You could draw, paint, or even make a model of your desert island. You may wish to label different parts of your desert islands for us so that we can see what the main features of your island are – and perhaps where you have set up camp or where you fish or swim.

Again, we love seeing your work – please post it on our Google Classroom! Many thanks!
