Round to estimate and approximate. Before you complete these questions, make sure you have tried questions 6, 7 and 8 on the activity sheet,

1. True or false?

   4,832 + 1,299 is approximately 6,000.

2. Use estimation to check if the following calculations seem to be correct.

10805 - 3867 = 7838   8468 + 340 = 10348

Round to estimate and approximate.

2. In a shop, you do not have time to calculate exact totals so estimation can be really useful.

Lincoln has £10 to spend at the market. Using estimation, determine if he has enough money to buy:

a) 3 boxes of raspberries and 1 box of blueberries.
b) 3 bags of spinache and 2 heads of lettuce.
c) 2 bags of apples and 2 boxes of raspberries.
