

Topic - Summer 2 Week 1 - Home Learning

Session 3

Today, you are going to start to plan your own exhibition. Think back to all the things you looked at yesterday – would any of those be a good starting point? What do you want your exhibition to be about?

If you find it hard to think of something, then choose either space, dinosaurs or sea creatures, but you may have something you know a great deal about or something you really love that you would like to create an exhibition about. You must, however, choose a topic or your exhibition will be confusing. In the space below, come up with a few possible titles/areas of interest and then choose one and complete a mind map to help you plan. On the mind map, you can include key facts, things you would want to see if you were going to see your exhibition, and any other interesting ideas you can think of – for instance, could you have a dinosaur skeleton you could walk through, or a meteor shower show on a giant screen?

How to share your work:

- Write your ideas into your exercise book and take a picture of your work.
- Create a PowerPoint.
- Write it onto a Word Document.
- Type directly into this document.

Once you've completed the work, submit your work to Google Classroom following this set of instructions:

1. Go to classroom.google.com
2. Click the class - Classwork - the assignment.
3. To attach an item, click 'Add or create' and select 'Google Drive', 'Link' or 'File' depending on what type of file you have created.
4. The status of your work will change to 'Turned in'.

My Exhibition

Idea 1	Click or tap here to enter text.
Idea 2	Click or tap here to enter text.
Idea 3	Click or tap here to enter text.
Idea 4	Click or tap here to enter text.

Now create a mind-map for your chosen idea. What will the title of the exhibition be? What key facts will need to be included? What would you expect to see if you were going to see the exhibition? Are there any other interesting ideas you can think of (e.g. could you have a dinosaur skeleton you could walk through, or a meteor shower show on a giant screen?)?
